

### **REMARKS**

In the subject Office Action, the Examiner stated that the Declaration filed with the present Reissue Application was defective because it fails to identify at least one error which is relied upon to support the reissue application in accordance with 37 CFR 1.175(a)(1). The Examiner continued that the Declaration is also defective under 37 CFR 1.175 because the residence where applicant resides was changed after the initial Declaration was filed.

The Examiner then rejected claim 1 under 35 U.S.C. 251 as being based upon a defective reissue Declaration.

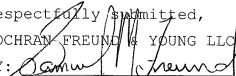

Applicant is submitting a new Reissue Application Declaration By The Inventor which specifically points out that Equation (0.3) is missing in line 17 of col. 9 of the Specification of issued U.S. Patent No. 5,959,574, as is text from lines 21-58 of col. 17 of the '574 Patent, in addition to numerous other instances of missing equations and text.

The Examiner then stated that no substitute specifications are permitted in a Reissue under 37 CFR 1.125(d), and that each paragraph being amended must be provided in accordance with MPEP Section No. 1453(1). Applicant has included an Amendments To The Specification section in the present AMENDMENT D. Applicant wishes to point out that column and line numbers identified in the Amendment To The Specification refer to U.S. Patent No. 5,959,574, and that no new matter has been added by these changes.

Applicant wishes to thank the Examiner for having pointed out these difficulties in the earlier filed Reissue Patent Application, and believes that the present AMENDMENT D addresses the issues identified by the Examiner.

Applicant respectfully requests that the indicated changes be entered into the present Reissue Patent Application.

Date: August 11, 2008

Respectfully Submitted,
